

Thank you for taking part in our study!

By participating, you are helping science! We want to understand how humans see objects and how our brains support perception. Your participation is a central part of this!

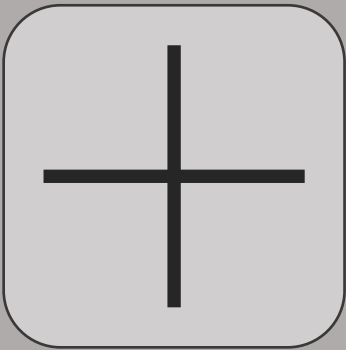

Press next to continue to the instructions.

Instructions

Your task is to **group similar objects together.**

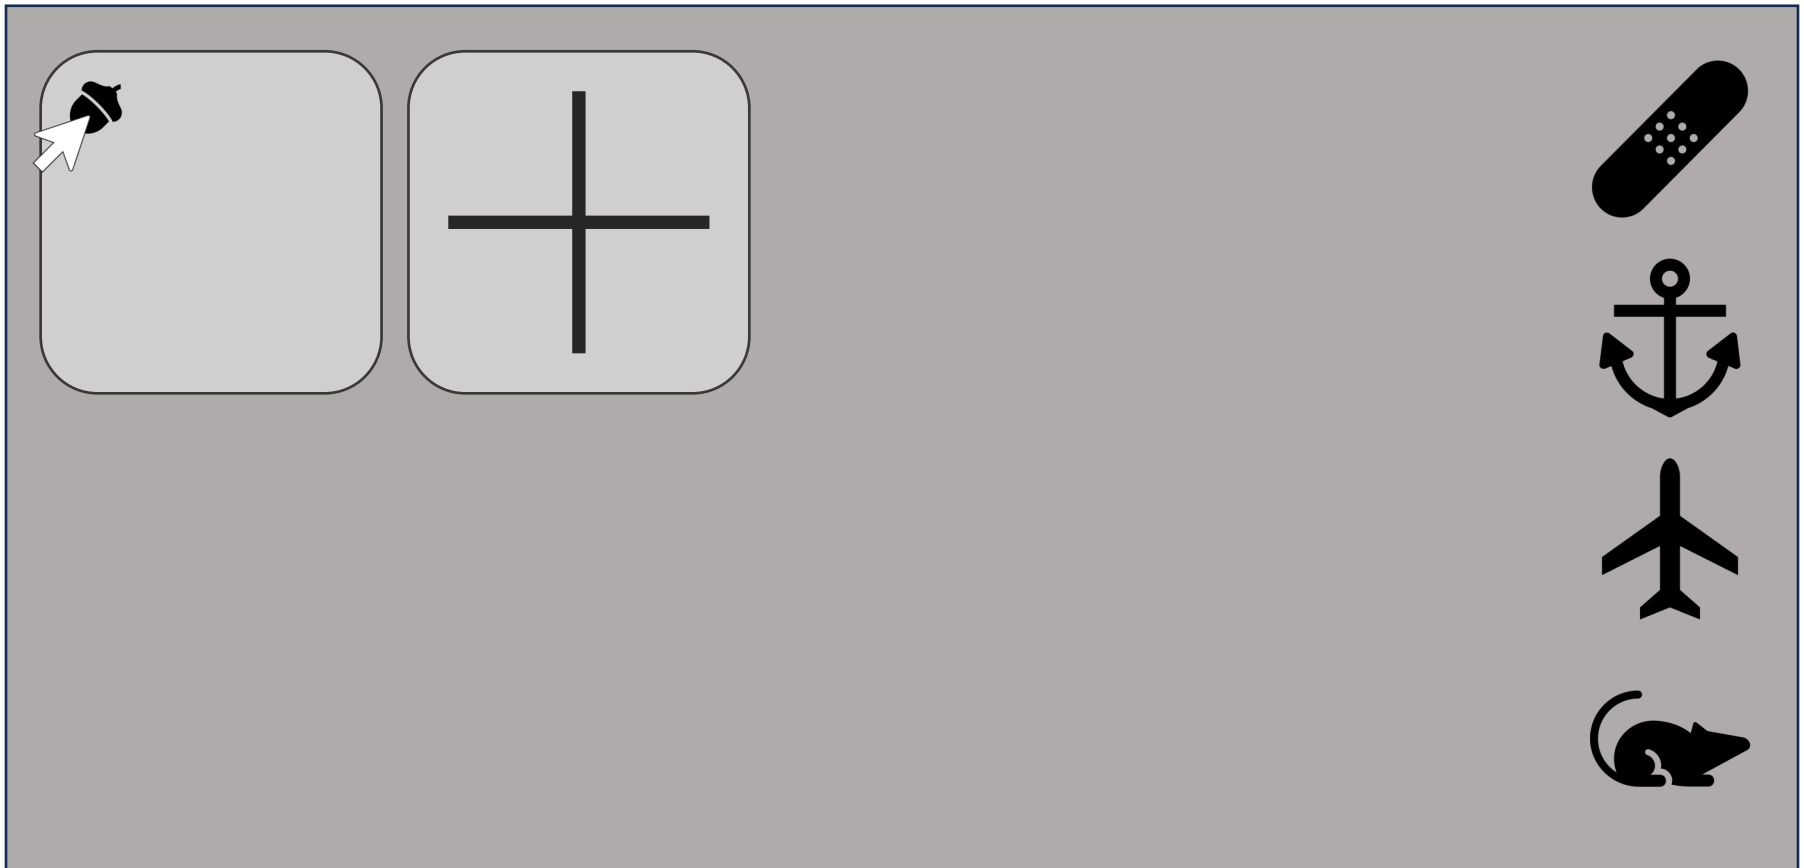

Press next to continue.

**Drag and drop the objects on
the right on the piles.**

By moving an object on the square with the cross you create a new pile.

You can create **8 piles or less.**

Similar objects should be on the **same pile** and **piles** should be **different from each other**.
